

Setting/Calling presets

Set presets

After moving the camera to the desired position, use the alphanumeric

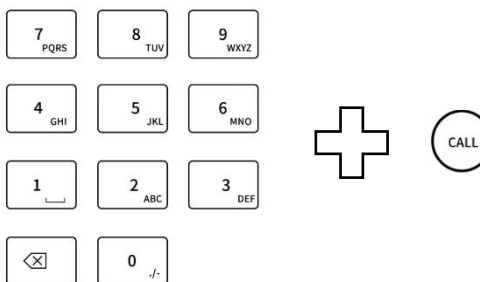

keyboard+  to set the presets.

Call presets

Use alphanumeric

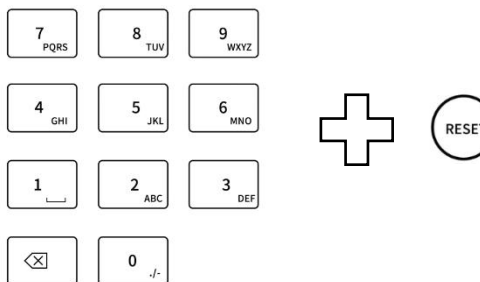

keyboard+  to call presets.

Reset presets

Use alphanumeric

keyboard+  to delete presets.

Tips:

1. The preset position can support up to 0-255. If the number exceeds this, the input/call will fail.
2. The NDI protocol does not support deleting presets.
